Dr. David A. Lee, M.D.

Damascus Dermatology & Skin Surgery Center has been an exciting addition to the community providing much needed medical, surgical and cosmetic dermatology services to patients of all ages. Established by Dr. David A. Lee, M.D., in 2012, this practice has become extremely popular because of its unique combination of modern technology, world-class expertise, and most importantly, good old-fashioned bedside manners.

Dr. Lee is the sole provider and has local roots, graduating from Walt Whitman High School in Bethesda, MD. He completed his undergraduate study at Cornell University where he graduated *magna cum laude* and then went on to medical school at Columbia University where he

where he also served as the Chief Resident in Dermatology. He completed additional fellowship training in Procedural Dermatology and Mohs Micrographic Surgery in New York with the former President of the American Academy of Dermatology, Dr. Daniel Siegel.

Dr. Lee's work has been featured in multiple media outlets including *The Washington Post* and *News Channel 8*. When asked about what makes his practice so special, his answer says it all: "This is an exciting time in medicine and I feel I have a unique opportunity to leverage technology to provide exceptional care. Our patients can go online to register, make appointments and refill requests, peruse skin care products/treatments,

finished within the top ten of his class. He returned to complete his Dermatology residency at The Johns Hopkins Hospital

and even utilize a telemedicine program called AcneTrac, in which they can download an application on their smart phone, snap photos of their acne, and be treated virtually."

Despite all the high technology in his office, Dr. Lee is a firm believer in the way medicine has traditionally been practiced. Dr. Lee explains, "I am the only provider in my office and my three assistants are like family. We take pride in serving our community and nurturing relationships with our patients. Whether I am calling to check up on a patient after surgery or running into one at the grocery store, I feel truly blessed to provide a service that is greatly needed and appreciated by the community."
